HEN beating rains and pinching winds
At night attack the lab'ring hinds,
And force them to retire—
How fweet they pass their time away
In sober talk or rustic play,
Beside the Social Fire.

There many a plaintive tale is told.
Of those who, ling'ring in the cold,
With cries and groans expire;
The mournful flory strikes the car,
They heave the sigh, they drop the tear,
And bless the Social Fire.
The legendary tale comes next,
With many an artful word perplext,

its natural failure may certainly be retarded, and the general habit of the eyes firengthen.d, which good purpofes will be promoted by a proper attention to the following maxims.

I. Never to fit for any length of time in absolute gloom, or exposed to a blaze of The reasons on which this rule is founded, prove the impropriety of going haftily from one extreme to the other, whether of darkness or of light, and shew us, that a fouthern aspect is improper for those whose fight is weak and tender.

2. To avoid reading a fmall print.

3 Not to read in the dusk; nor, if the eyes be difordered, by candle-light. Hapby those who learn this lesson betimes, and begin to preferve their fight, before they are reminded by pain, of the necessity of sparing them; the frivolous attention to a quarter of an hour of the evening, has cost numbers the perfect and comfortable use of their eves for many years; the mifchief is effected im-I 33 perceptibly, the consequences are inseparable.

4. The eye should not be permitted to dwell on glaring objects, more particularly on first waking in a morning; the fun should not of course be suffered to shine in the room at that time, and a moderate quantity of light only be admitted. It is eafy to fee, that for the fame reasons, the furniture of a

APRIL. Fourth Month

To win the coy distaintul maid,
And eyes the Social Fire.
To these succeeds the jocund song,
From lungs less musical than strong,
And all to mirth aspire;
The humble roof returns the found,
The social can moves briskly round,
And brighter burns the Fire.

Where'er th' acrial active vapour flies! It drives the clouds, and ventilates the skies; Sweeps from the earth Infection's noxious train, And swells to wholesome rage the fluggish main;

too fuddenly from an extreme of darknefs into a blaze of day. How dangerous the looking upon bright luminous objects is to the fight, is evident from its effects in those countries which is covered the greater part of the year with snow, where blindness is exceedingly frequent, and where the traveller is obliged to cover his eyes with crape, to prevent the dangerous, and often fudden effects of too much light: even the untutored favage tries to avoid the danger, by framing a little wooden cafe for his eyes, with only too narrow flits. A momentary gaze at the fun, will, for a time, unfit the eyes for vision, and render them infenfible to impressions of a milder nature.

On Public Places.

HERE feems at prefent fuch a rage for pleafure, that folitude appears insupportable, and domestic comfort stupid. An immoderate fondness for dress is acquired, and many fashionable semales spend half the night in going from one place to another merely to display their finery.

In the fine lady how few traits do we obferve of those affections which dignify human nature! If the has any maternal tenderness, it is of a childish kind, and were she to live many years she would still be a child in.

understanding.

JULY. Seventh Month.

In the thick cloud's tremendous gloom,
The Light'nings lurid glare,
It views the fame All-gracious Pow'r,
That breathes the vernal air.
Thro' Nature's ever varying fcene,

Thro' Nature's ever varying icene,
By different ways purfu'd,

The one eternal end of Heav'n Is univerfal good.

Diffipation leads to poverty, which cannot be patiently borne by those who have lived on the vain applause of others, on account of outward advantages; these were the things they imagined of most consequence, and of course they are tormented with false fhame when by a reverse of fortune they are deprived of them.

In fuch fcenes, what a painful train of reflections must arise in the mind! What convictions of the vice and folly of the world are prematurely forced on it. It is no longer a paradife, for innocence is not there; the taint of vice poisons every enjoyment, and affectation, though despised, is very contagious; languor follows the extraordinary exertions, and weak minds fall a prey to imaginary distress, to banish which they are obliged to take as a remedy what produced the difeafe.

We talk of amusements unbending the mind; fo they ought; yet even in the hours of relaxation we are acquiring habits. A mind accustomed to observe can never be quite idle, and will catch improvement on all occasions. Our pursuits and pleasures should have the same tendency, and every thing concur to prepare us for a flate of purity and happiness. There vice and folly will not poison our pleasures; our faculties will expand, and not miftake their objects; and we shall no longer ' fee as through a glass darkly, but know, even as we are known.

AUGUST. Eighth Month.

The fame unchanging Mercy rules
When flaming ather glows,
As when it tunes the linnet's voice,
Or blushes in the rose.
By Reason taught to scorn those fears
That vulgar minds molest;
Let no fantastic terrors break

Method of freeing Apple Trees from Moss:

THIS method confifts, in daubing over the trunk, and all the large branches of the tree, when the fap begins to rife, with a large bruft dipped in white waft, made of lime pretty thick, the moß and all the rotten bark, will foon after drop off, and be replaced by a new bark entirely fmooth.

To prefer ve Apples.

STREW a quantity of dry white oak leaves, fo as to cover the bottom of the hogfhead, on these place a layer of found hand picked apples, cover them with leaves, then another layer of apples, and so na lternately, leaves and apples, till you have the quantity desired; keep them in a dry place free from frost.

Approved method of keeping Crows from Corn Land.

TAKE a quart of train oil, as much turpentine and fome bruifed gun-powder, boil them together, and when hot, dip pieces of rags into the mixture, and fix on flicks in different parts of the field, five or fix may ferve for an acre. The birds will not approach the fpot.

Receipt for deflroying Bugs.

DISSOLVE half a drachm of corrolive fublimate, in a quarter of an cunce of spirits of turpentine, shake the whole well together,

wash all the places were the bugs are supposed to lodge, with a brush, in the same manner rooms are white-washed.

Useful Hint communicated by the Royal Society of Sweden to that of London.

AFTER roofing a house with wood, boil tar in a kettle, and mix finely pulverized charcoal with it, till it is of the truckness of mortar; spread this with a trowel about a fourth of an inch thick over the roof; it will foon grow hard, and defy the viciliatudes of the weather. Roofs thus covered have stood in Sweden above a century and still want no repair.

Comparison between the Inhabitants of Denmark
and Sweden.

THESE two nations, feparated by a firait only, whose origin is doubtles, the same, who inhable climates nearly the same, and speak the same language, exhibit remarkable contrasts, both as to country, and inhabitants. In Denmark, the foil is stony but susceptible of cultivation; the hills are small, the woods of no great extent, but the plains are vast and boundless: and there are many small lakes, bet no rivers. The clothes of the men are long and of a red colour. In Sweden, on the contrary, nothing is seen but mountains, rocks, deep vake, ex-

On Political Experience.

A MODERN philosopher has told us, that all knowledge arises from experiences that therefore new experience is the beginning of new knowledge, and the increase of experience, the beginning of the increase of knowledge. The occurrences of life or business, which we pass through in a long series of years, fufficiently confirm the truth of this observation, which is further illustrated by the following ancedote, related by fir James Porter, formerly ambassaor at Constantinople.

DECEMBER. Twelfth Month.

Perform'd fome glorious act of love for us, We keep the time in mem'ry of the thing." Hence he to Jesus points his good intent,

With pray'rs and praises celebrates his name;

And as to Christ alone his love is meant,

The Lord accepts it—and who dares to blame?
For tho' the shell indeed is not the meat,
'Tis not rejected when the meat's within?

" Live whilft you live," the facred Preacher cries

" And give to God each moment as it flies.

"Lord, in my views may both united be "I live to pleafure when I live to thee."

After he had the age in which he lived. conducted buliness of the highest importance for many years, with great reputation, he happened one day to he furprifed by fome of his friends, in his closet, leaning on his elbow, and buried in a profound reverie. Upon their enquiring into the fubject of his meditation, he made answer, that " he had been endeavouring to recollect the various transactions of his past life, and that he was astonished and counfounded by a view of the great number of errors he had committed, and of the dangers to which he had exposed the nation, merely for want of fufficient experience to dire 2 him."

TO love an enemy, is the diffinguishing characteristic of religion, which is not of man but of God. It could be delivered as a precept, only by him who lived and died to chablish it by his example.

IF thou doft good to man, as an evidence of thy love to God, thy virtue will be exalted from moral to divine; and that happiness, which is the foretaile of paradile, will be thy reward upon earth.
